

Colostrum Concentrate

Newborn

Concentrated colostrum powder with egg powder proteins, beneficial bacteria and vitamins to provide calves with a complete colostrum feed.

Features	Benefits
Colostrum	Supplies natural colostrum which can be absorbed into the blood stream provided it is administered ideally within the first 6 hours of birth.
Egg Powder Proteins	Supplements the natural colostrum.
Beneficial bacteria, 2.5 billion per application	Contains the same high level multi strain beneficial bacteria that are in Protect. These beneficial bacteria physically exclude harmful pathogens from attaching to the gut wall and improve digestion.
Vitamins A, D ₃ & E	To counter common deficiencies in new born calves.
High-level easy-absorbable energy	The lactose and oil provides instant and slow release energy to the newborn calf therefore helping to get it up and sucking quicker.
Easy mix	Formulated to mix easily in luke-warm water making it easy and fast to use.
Foil sachet	Sealed in a foil sachet for freshness and preservation of nutrients.

When to use: At birth or for bought-in calves to give the calf protection against harmful pathogens and provide energy to get up and suckle its mother.

Unit size: 300g foil sachet in a box, 300g in a bottle and 6 x 300g

Applications per pack: 300g (sachet and bottle) is one application, 6 x 300g provides six applications.

Trade pack size: 300g sachet, 300g bottle and 6 x 300g.
