

# 5 TOP TIPS: Post-surgery recovery

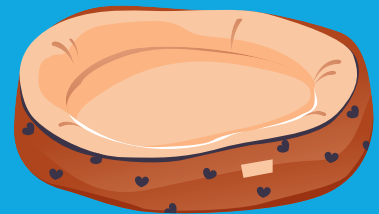

## #1. Follow vet advice

Follow your vet's post-op instructions carefully in regard to medication and physical activity. Always monitor for any signs of complications.

## #2. A quiet & safe space

Provide a quiet and comfortable space for your pet to rest and recover, away from other animals or loud noises.

## #3. Help with mobility

Help your pet with any mobility issues they may have, such as assisting with walking or using a sling to support them while going up and down stairs.

## #4. Monitor appetite

Monitor your pet's appetite and provide them with small, frequent meals if necessary.

## #5. Lots of attention

Offer plenty of love and attention to your pet, but also give them space and allow them to rest when needed.
