

# 4

## TOP TIPS:

# Protecting your pet in the dark

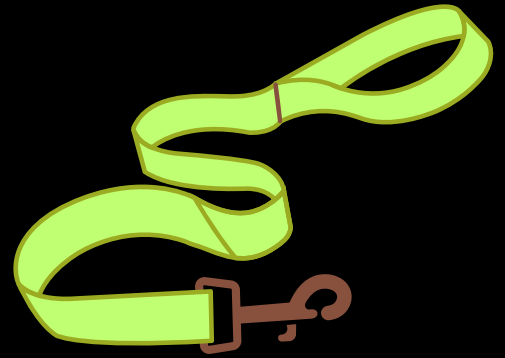

### #1. Reflective collars

Use a reflective collar to ensure your pet can be seen and stays safe. For cats, consider keeping them inside after dark.

### #2. On the lead

Keeping your dog on the lead helps you to have better control of your dog and minimise risks.

### #3. Verbal commands

Train your dog to respond to verbal commands such as 'wait' 'sit' 'stay' and 'go' to ensure you have control when out walking.

### #4. Stay visible

You're easier to see than your pet, wear reflective items, carry a torch, and where possible, stay on well-lit paths.
