

Quick-Stop by Bray silver nitrate pencil

Title

Quick-Stop 95 % Silver Nitrate Pencil by Bray – Fast-Acting Nail, Paw & Minor Wound Care for Pets – Veterinary-Grade Tool You Can Use At Home for Grooming & Small Injuries

Key Features/Short Description

- **Rapid Nail & Injury Care:** High-potency 95 % silver nitrate styptic pencil formulated to manage minor injuries—ideal when a nail is overly-trimmed and the quick is exposed or on a bleeding wound.
- **Dual Activation & Simple Use:** Activate with a drop of water or natural moisture from the bleeding wound—dab gently, no pressure required.
- **Economical Multi-Use:** Each pencil provides multiple applications for the same pet; produced in the UK to strict quality standards.
- **Trusted & Vet-Recommended:** Antimicrobial properties encourage natural clot formation and support clean, healthy recovery—perfect for pet parents, groomers, and veterinary professionals.
- **Compact & Portable:** Lightweight purple case with secure cap fits first-aid kits or grooming bags for easy, on-the-go nail care.

Long Description

The **Quick Stop Silver Nitrate Pencil by Bray** offers professional-grade first-aid care for minor injuries such as an **over-clipped nail** or other **grazes or cuts**. Whether you are a groomer, a vet, or a dedicated **pet parent**, this 95 % **silver nitrate** pencil provides reliable, on-the-spot support when a **pet gets injured**.

Activation is straightforward: moisten the tip with a single drop of water or allow natural moisture from the bleeding wound to trigger the **silver nitrate**, then gently dab the **injury**—no need to **apply pressure**. If needed, simply **remain calm**, hold a clean cloth to the injury or nail, and reapply to support the natural clotting process. Each pencil is designed for **single-animal, multi-use**, giving several applications and excellent value for **pet owners** and grooming professionals.

A **styptic pencil** helps protect the **injured area** and encourages a protective **blood clot** to form so the area is quickly managed. Compared with ordinary **styptic powder**, the Quick-Stop pencil allows precise, mess-free application directly to the **pet's injury**, and with antimicrobial/antibacterial properties helping the wound stay clean while nature does the rest.

Dogs' nails contain a sensitive quick rich in tiny **blood vessels** and nerves. During trimming or filing, a misjudged clip or an overgrown **dew claw** can expose the **nail bed**, causing discomfort and natural bleeding. Routine maintenance helps prevent problems. Keep your **dog's nails** and **black nails** neatly **trimmed** to reduce the chance of a painful **broken nail**. During regular **nail clipping**, trim a little at a

time to avoid the sensitive quick and maintain a healthy **nail bed**. Even with care, accidents can occur, and this **first aid** essential ensures you're prepared.

Beyond nail care, the Quick Stop – Silver Nitrate Pencil by Bray can also be used to manage other small pet injuries. **Minor scrapes, tiny surface cuts, or nicks** from grooming tools on areas such as **paws, ears, or tails** can benefit from the pencil's precise application and natural antimicrobial action. By helping the skin stay clean and encouraging a protective barrier to form, it provides convenient, on-the-spot support for a variety of everyday pet mishaps, giving owners extra confidence during routine grooming or outdoor adventures.

Made in the UK to rigorous standards, the Quick Stop – Silver Nitrate Pencil by Bray pairs the proven action of **silver nitrate** with a sturdy, portable design. Its lightweight purple holder and secure cap make it easy to store in a grooming bag or household **first aid** kit so you're ready whenever an injury on an animal needs attention.

After each use, dry the tip with a tissue, recap securely, and store in the original packaging away from light and moisture. Intended for animal use only and not licensed for humans, this pencil is trusted by veterinarians and professional groomers to help pets stay comfortable, active, and protected when **nails are trimmed**, a **dew claw** is torn, or an **injury** requires care.

Safety Notes

- For animal use only – not for humans.
- Contains corrosive silver nitrate & potassium nitrate; avoid skin/eye contact and protect surfaces (may stain).
- Not for large or surgical wounds.
- Store in original packaging away from light and moisture.
